

A secure and accountable site
to meet the challenges of the 21st century

OIL & GAS

Your complimentary invitation from Thales

You are invited to a FREE event showcasing the latest technologies available, including Biometric Integrated Safe System of Work, Securely Integrating Site Data and Upstream Collaboration

"It is of vital national importance that the UK maximises the recovery of its still substantial oil and gas reserves. This will demand the dedication of considerable financial and human resources and the continued application of leading edge technology. Much of that technology will come from within our own industry but there is also a great deal that we can learn from others. I thank Thales for arranging this event to give us the opportunity to consider some of the possibilities they see for technology transfer from other industries."

Malcolm Webb, Chief Executive, Oil & Gas UK

Visit us on the **26th or 27th November 2008** at the
